

Wireless Module W

W-LAN interface for touchONE-10-W reservation panel

Product code: **CS0635**

Main features

- Extension for touchONE-10-W
- W-LAN IEEE802.11a/b/g/n/ac compliant
- Integrated antenna
- Simple installation

Description

The Wireless Module W is an expansion accessory for touchONE-10-W reservation panel. It allows **Wi-Fi communication** as a replacement for a wired Ethernet connection. This module is not compatible with other touch panel models.

If wireless communication is used, the panel must be powered by PoE as when using wired Ethernet. However, it does not need to be connected to a PoE switch, but a local PoE adapter is sufficient. This can save Ethernet infrastructure costs in many cases.

Specifications

Wi-Fi

- Compliant with IEEE802.11a/b/g/n/ac
 - 2.4GHz - channels 1-11 are supported by the current firmware
 - 5Ghz - channels 36-48 are supported by the current firmware

Extension for

- touchONE-10-W reservation panel

Physical

- Dimensions 22 x 47 x 16 mm / 0.9" x 1.9" x 0.6" Weight 10 g / 0.02 lb

Environment conditions

- Operating temperature 10° to 40° C
- Storage temperature 0° to 60° C
- Relative humidity 10% to 90% non-condensing

Box contents

- Wireless Module W
- Plastic cover
- Installation screw M2x10
