

IN-Wall Enclosure for Vaddio RoboSHOT UHD Cameras **SKU: 999-2225-021**

A recessed in-wall mounting solution for a sleek camera installation.

Key Features:

- Supports phased installation: in-wall mounting box can be installed during initial room build-out; camera platform and face frame can be added later
- Camera platform extension from wall: 6.1 inches
- Cold-rolled steel construction

Using the depth of the wall cavity to minimize the camera's extension into a room, the IN-Wall Enclosure is an attractive way to integrate a PTZ camera into any room. The entire enclosure can be painted to match any room's décor and the reinforced camera platform is made of cold-rolled steel, for rigidity and durability. The modular design allows the in-wall mounting box to be installed during initial room build-out, with the camera platform and face frame to be added later.

The camera enclosure is designed to house a camera and the EZCamera Interface Module (EZIM™) of a OneLINK camera extension system, for greater flexibility in camera placement when a OneLINK-compatible camera is used.

Don't see your camera here? Please use the MountFinder™ tool to see which of our camera mounts may work for you. Additional camera models not noted here or in MountFinder™ may fit on this mount, though they may require modifying the mounting holes.

This Package Includes:

- Wall box enclosure for the camera
- Face frame
- Heavy-duty camera platform
- Mounting hardware
- Quick-start card
