

Professional projector
installation products for
rental & staging

Audipack[®]

It's great to have solutions...

Ultimate *flexibility*

with projectors

The Audipack rental & staging program offers a product line that specially designed for safe and accurate projector installation to trusses and other temporarily constructions.

The UTC product line offers products with a basic or special 3D micro adjustment ball joint, available in fixed lengths or with telescopic tube sets.

These tube sets are ready to install including pre-installed truss clamps.

UTC - 3D

The advanced UTC-3D model is a slim and practical tube set with the same installation benefits as the standard UTS, but equipped with a special **3D** micro adjustment ball joint.

The **3D** ball joint makes it possible to line-out several projectors in a row using a "pixel on pixel adjustment feature".

By simply manually adjusting one of the 3 positioning knobs, each axis is separately adjustable with high accuracy.

An ideal product for using with:

- Seamless projection
- Long distance projection adjustment
- Projected simulation
- Camera positioning

▲ **Max. load 30 kg**

▲ **3D adjustment pitch 11, roll 11, yaw 11 degrees**

▲ **Colour aluminium / RAL 9005 black**

▲ **Pre-installed truss clamp**

UTC

The standard UTC tube set with basic ball joint offers also a slim and very practical truss mount that allows you to install the projector and tube set very easily and quickly. The standard Audipack ball joint has excellent adjustment features to aim and lock the projected image on the projection screen.

With a standard available Audipack projector mount almost any brand and type is applicable to install.

▲ **Max. load 30 kg**

▲ **Angle adjustment 15-15-360 degrees**

▲ **Colour aluminium / RAL 9005 black**

▲ **Pre-installed truss clamp**
