

Quick installation!

Single column 900 series ceiling to floor installation for flat panels.

A free standing and solid solution in any environment.

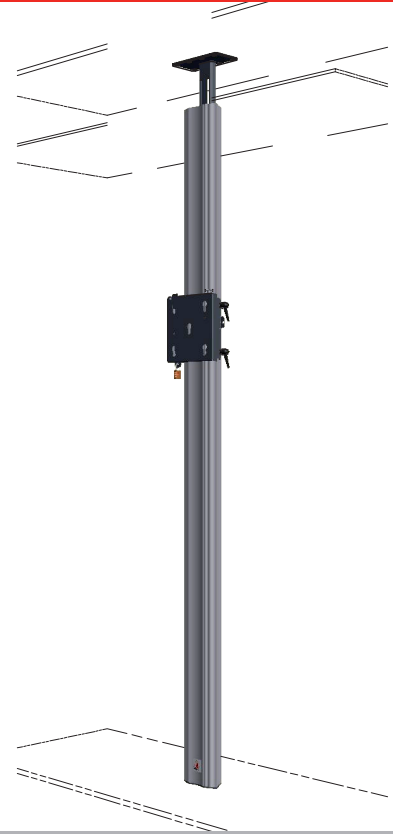

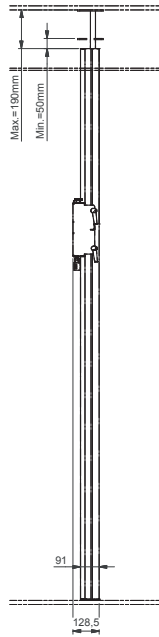

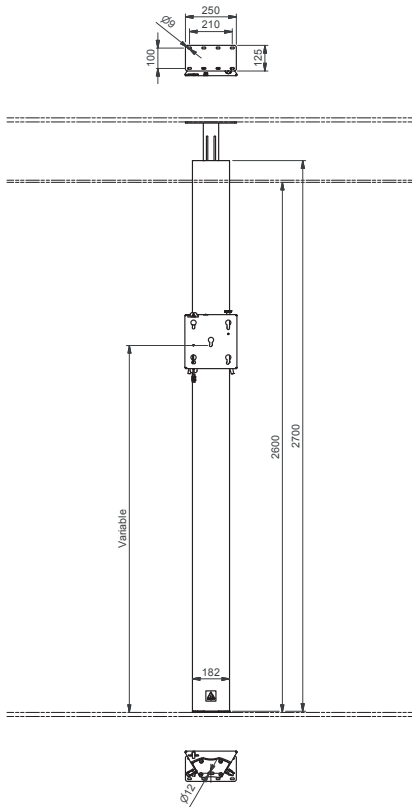

A flat panel or touch screen is easily installed in the middle of the room or in front of a glass wall with the Audipack ceiling to floor solutions.

The 900 series column is invisible mounted between the floor and ceiling and makes it possible to mount one or several screens on one location.

The monitor cabling is easily stored in the internal cable duct which is accessible from the outside.

- ▲ **A free standing solution**
- ▲ **Rigid and flexible construction**
- ▲ **Single or multi screen installation**
- ▲ **Integrated cable duct**
