**CAN BE USED ON STAGE AS A**  
**LINE ARRAY**

# LVT-465

## LEVIATHAN SERIES

### STAGE MONITOR

- LVT-465 is a new stage monitor concept developed by the team HORTUS AUDIO.
- HORTUS AUDIO succeeded in designing an **extra flat** and **extra powerful** stage monitor.
- This stage monitor can be coupled in the same way as a **LINE ARRAY**.
- The directivity is increasingly marked with increasing of monitors.  
This design helps to limit noise pollution on a stage and to get very high pressure levels, while limiting the risks of acoustic feedback.

## TECHNICAL SPECIFICATIONS :

- 4 x 6" Neodymium Loudspeakers.
- 2 x 1.4" Compression Drivers + Waves Guide.
- 950 W AES / 8 Ohms.
- Can be used as a Horizontal Line Array Stage Monitor.
- 2 x Speakon (4 points) Inputs with +1-1/+2-2 Switch Button.
- Compact 15 mm Baltic Birch Plywood Enclosure.
- Finish 3 Layers of Highly Resistant Structural Polyurethane Painting.
