2m long USB3.1 Gen1 5Gbps Superspeed Type-A to USB Type-C cable

Details

This Type-A to Type-C USB cable offers data speeds up to 5Gbps and allows users to connect their devices to Lightware's extenders and switchers. The cable's length of 2m is ideal for most meeting room and presenter's desk applications. We warmly recommend this cable for 4K USB cameras or video bars for example, as a superior alternative to the cables factories often provide, which may not match the capabilities of ours. Those factory cables aren't long enough and/or sometimes don't support USB3.1, only USB2.0. Lightware's reliability, build-quality and technical parameters make this accessory our number one choice for your AV needs.

Features

- **2m length for comfortable use**
- **Supports 4K cameras, video bars, SSD storages and conference devices in meeting rooms**
- **Supports peripherals via USB 2.0 up to 480 Mbps (Mouse, Keyboard, Thumb Drive, Speakerphone and Webcam)**
- **Powers Huddly and other high power demand USB3 webcams from Taurus UCX**
- **Reversible USB-C connector**
- Cable plug fits all USB-C notebooks, tablets and devices
- PC, Mac and mobile compatible

Specifications

Interface	Connectors	1xUSB Type-C™ plug & 1xUSB Type-A plug
Technical characteristics	Data rate	up to 5Gbps
	Data type	USB3.1 Gen 1, USB2.0 and USB1.1 compatible
	Maximum Current	5V, 1000mA
	Environmental	RoHS; REACH
Physical characteristics	Length	2m
	Cable diameter	4.5mm
	Pin coating	Nickel-plated
	Jacket material	PVC
	Connector material	Plastic
	Color	Black
	Bending radius	45mm
Note	The cable is bi-directional.
