

## USB Capture Card

HCP-1080

*Sleek, small HDMI Capture Card with a high-end design.*

### Portable plug-and-play Capture Card

This standalone HDMI Capture Card is sleek, small, and standardized. Easy to set up with non-proprietary connectors and cables, the small and easily transportable device is ideal for live streaming, conference rooms, video recording, and more. Created with high-end design in mind, the HDMI Capture Card requires no external power and eliminates visual clutter with no extraneous cords required.

The HDMI Capture Card has no drivers to install and leverages the capabilities already built into current software for a seamless experience. As the device is compatible with most third-party software, just plug and play in Windows, Mac OS X, Linux, and Chrome, with no guesswork needed and fully upgradable firmware.

Ensuring reliable video and streaming for a high quality and glitch-free experience, the HDMI Capture Card supports up to 1920x1080@60fps (1080p) up/down conversion of video without CPU interaction, optional MJPG compression and audio capture up to 48 KHz PCM. Includes a 3-year warranty.

New standalone HDMI 1.4a compatible input card from Mimo Monitors is a superior solution for conference rooms, streaming, video recording and more.

#### Features:

- Converts HDMI to standard PC webcam data. Converts video and audio from HDMI to USB Video Class (UVC) and USB Audio Class (UAC) data.
- The sleek, design requires no external power and eliminates visual clutter with no extra cords required.
- Simple to set up and standardized with no proprietary cables or connectors for a seamless experience.
- Customize for your application with a plug-and-play solution—no driver downloads.
- Audio capture up to 48 KHz PCM. Uses USB 2.0 for audio.
- Integrated ISP (Image Signal Processing) engine supports most UVC defined image adjustments; Anti-flicker operation with multiple framerates supported.

#### Applications:

- Converts HDMI to standard PC webcam data
- Converts video and audio from HDMI to USB Video Class (UVC) and USB Audio Class (UAC) data
