

Table Connect Box

Axonometric opened view

The Table Connect Box (TBC) is a cable pass-through bracket for six AV signal cables, for easy BYOD connection, which also hosts two power outlets. An extender for video signals can be mounted under desk and the cables can be connected, without being visible when not in use.

User can open the lid and pull out the required AV cable to connect to the source device. When not used, the cables can be placed back inside and held by their own weight. The excess cable parts remain hidden by dropping out of sight below the TBC, under the desk.

The installation is quick and easy with the supplied mounting kit.

Features

- 2x multi-region AC connector
- 1x IEC power input on bottom (with locking flange)
- 6x cable holes for cable pass-through Laser cut metal housing
- Soft open and close mechanism
- Desk cut hole size: 179 x 145 (mm)
- Device dimensions: 193 x 184,8 x 163.2 (mm)

Supplied Accessories

- 1x Power cable
- Mounting kit
