

CAB-USB-AMAF-T1000A SKU 13740021

10m long USB 3.1 Gen1 SuperSpeed Active Extension Cable TypeA/male to TypeA/female

Details

Lightware's 10m and 16m active repeater cables provide incredible flexibility and reliability for project design by allowing users to extend USB signals over longer distances, making these versions particularly suitable for larger collaboration spaces.

Featured with innovated repeater technology, these extension cables are capable of extending USB 3.0/3.1 Gen 1 over 10 meters at 5 Gbps SuperSpeed data rate that support 4K video transmission for webcams and can be used for SSD storages as well.

The cables offer low delay and high compatibility with various of USB peripherals such as mouse, keyboard, thumb drive, speakerphone and webcam and are Plug & Play with PC (Windows), MAC and Linux.

Also being certified for the **Taurus UCX**, the cables can provide power for USB 3.0 webcams including Huddly products.

Highlighted features

- No bulky repeaters along the cable helps installing cable conduit
- Active repeater cable for 10m extension distance
- Native USB2/USB1 and USB3 extension
- Taurus UCX powered: No external power source or any additional pigtail cables needed
