

**Audipack Screen-Crawler, safe installation aid for large screens**

The installation of large LCD screens is often a challenge, and not without risk. The Screen-Crawler (SC-200) makes it possible to safely lift large screens, with a minimum of effort and less installers. You simply attach the screen with hoisting cables/bands to the hoist aid and hoist up the screen with the winch. After placing the screen to the wall mount, you're done!

With a WLL lifting capacity of 200 kg it can handle mostly all large screens. The Screen-Crawler has a length of 2,2 meter when retracted and when extended it has a maximum installation height (hook height) of 3,55 meter. It's easy to transport, due to its light weight.

The Screen-Crawler not only saves you a lot of installation time, but also ensures safe working.

- ▲ **Complies with NEN-EN-ISO 12100:2010NL**
- ▲ **Work load limit of 200 kg**
- ▲ **Max. installation height 3550 mm (hook height)**
- ▲ **Transport length (retracted) 2200 mm**
- ▲ **Power grip suction cup for slippery floors**
- ▲ **Yearly check-up required**
